## WORK EXPERIENCE

---

**Company:** Tudip Technologies Pvt Ltd, Pune.

**Title:** Quality Assurance Consultant, **Time Period:** May 2025 to Present.

### Tasks Performed:

- Designed and executed functional, UI, and regression test cases for the Cleerly healthcare web application, ensuring accurate heart diagnostics and reporting workflows.
- Collaborated with developers to log, reproduce, and verify frontend issues related to studies and medical coronary report visualizations.
- Tested organization creation workflows, including Hub and Spoke configurations within the application.
- Performed testing of patient study upload and processing functionalities across various scenarios.
- Tested application tools such as Vessel Wall, Epicardial Fat Removal, Lumen Vessel Wall, Tracker, Stent, Stenosis, and CTO tools.
- Tested patient coronary report generation for individual patient studies.
- Verified Provider Reports and overall Coronary Reports for accuracy and completeness.
- Suggested UI/UX improvements for report sections, improving accessibility and reducing user confusion.

**Company:** mPHATEK Systems Pvt Ltd, Pune.

**Title:** Test Engineer, **Time Period:** November 2024 to January 2025.

### Tasks Performed:

- Designed and executed test cases for the Bajaj Finserv app and website, focusing on key functionalities such as loan applications, EMI calculations, and account management features.
- Developed detailed test plans and test cases for the Bajaj Finserv platform, covering functional, end-to-end, regression, and UI testing, with a focus on maximizing test coverage for critical user flows like loan disbursal and payment processing.
- Collaborated with cross-functional teams to identify and resolve defects, improving the overall system efficiency.

**Company:** Sears Holding India Pvt Ltd, Pune.

**Title:** Front-End Developer, **Time Period:** February 2023 to February 2024.

### Tasks Performed:

- Implemented a feature in the HomeWarrantyPlansPage to trigger the 'shsGlobal' event when plans are loaded, adding attributes 'Default Plans' and 'Personalize Plans' to the event.
- Added 'datametricid' and 'datametricvalue' attributes for location pages, components and for CTA buttons on SHS website.
- Enhanced mobile user experience by adding a virtual numeric keypad for specific flows.
- Updated styling for various components, such as progress bars and various other modals.
- Removed unnecessary scripts and implemented enhancements for mobile and footer components.
- Fixed bugs related to a duplicate shsGlobal event on edit address field.

- Improved error handling for forms, ensuring name fields do not accept numeric values.
- Implemented a custom fallback error pages for 404 and 500 HTTP error codes.
- Improved handling of disclosures in the Home Warranty Add Program flow.
- Fixed suggestion list, alphabet highlighting and sorting issues improving search UX experience.
- Implemented best practices for improving LCP, including migration to nextjs13 images, lazy loading, image compression, which contributed to measurable outcome, such as faster load times.
- Analysed and optimized LCP across multiple sears pages using tools like Google Lighthouse and Chrome DevTools, leading to a one percent reduction in load times and improved Core Web Vitals scores.

**Company:** Sears Holding India Pvt Ltd, Pune.

**Title:** QA Engineer, **Time Period:** December 2021 to January 2023.

#### Tasks Performed:

- Designed and automated test cases for the company's service order management, key feature scheduler.
- Created AWS code build project to integrate in code pipelines.
- Used Playwright for test automation, conducted unit and functional testing using tools like GraphQL Playground, Omnibug, and NPS Mainframe software.
- Designed functional, E2E test cases for sears home service website for functionality and efficiency.
- Validated the Service Order API calls using Postman, ensuring the correct functionality of endpoints by verifying response status codes, data accuracy, and payload structures.
- Designed and automated testcases for sears home service scheduler using playwright.
- Reported and tracked issues using Jira, contributed to improvement of sears home service.
